# Notification regarding certification and the new Sonance Invisible Series

The all-new Invisible Series (IS4, IS4SST, IS4W, and IS2) family of products from Sonance combines the latest in flexible installation methods combined with superior sonic performance.

The IS4, IS4SST, and IS2 are designed to impress your most discriminating audio clientele with performance more reflective of a traditional loudspeaker while the IS4W redefines the invisible subwoofer.

Additionally, advances in installation methods have allowed us to eliminate the certification requirement for the new IS4, IS4SST, IS4W, and IS2. We will still require those customers selecting the SA2 and SA2C to undergo our certification process, as there will continue to be special steps required to finish the product.
