SONANCE OPTILINQ 4 IR REPEATER KIT with USB POWER ADAPTOR

Introduction

Sonance IR products provide a simple solution to controlling multiple AV devices. The IR Receivers pick up commands from an infrared remote control and send them to one or multiple points to be re-transmitted through an IR Emitter. This system allows electronic components to be hidden in cupboards or mounted remotely in a rack while still providing a reliable means of controlling them locally from a single point.
