Determine the location for the mounting platform. Ensure there is adequate room for the BPS6 Subwoofer at the location of the platform. The speaker opening must be located 12” (305mm) from the BPS6 Subwoofer to allow the port tube to reach through the platform.

Place the mounting template on the side of the joist and drill four 1/2” (12.7mm) holes through the joist at the locations shown on the mounting template.

Hold the side of the BPS6 Subwoofer with the rubber damping pad up against the side of the joist and install the four lag screws and washers to secure the BPS6 Subwoofer in place.

Attach the mounting platform to the joists. For mounting platform installation details visit www.sonance.com/in-wall-in-ceiling/architectural-series/medium-speaker-subwoofer.

On the end of the BPS6 port tube there is a tether. The tether will be used later to guide the BPS6 port tube through the mounting platform opening.

Position end of port tube as close as possible to the back of mounting platform. Loop tether into the anchored zip tie and secure. This process ensures that the bandpass connector is easily attached later and other tradespersons won’t infringe on the port tube assembly area.

Secure the wire to the zip tie to prevent accidental removal. Attach the four conductor wires to the input terminals. Positive wires to red terminals and negative wires to black terminals. Run a signal test using a 9V battery. NOTE: Port tube contains foam plug with tether, make sure pressure levels don’t expel the foam and tether.

If it is not possible to locate the BPS6 Subwoofer 12” away from the bandpass connector, the extra hose material (up to 8”) must be removed. While it is okay to shorten the hose, never extend the hose length.

Box Contents
- (1) Quickstart guide
- (1) Bandpass Subwoofer w/ port tube
- (1) Cardboard mounting template

Mounting screws & washers:
- (4) 5/16” x 2” lag screws (for thinner beams)
- (4) 5/16” x 3” lag screws (for thicker beams)
- (4) 5/16” washers

Bandpass Subwoofer can be installed in joists spaced 16” on center or greater.
