INVISIBLE SERIES

Sonance Invisible Series Commercial Loudspeakers are the ultimate expression of architectural audio, delivering uncompromising aesthetics combined with unequaled sonic performance.

The IS6T, is a ground-up design, utilizing completely new technologies that deliver a level of fidelity that is unheard of in this category. High frequencies are achieved with Sonance’s “Motion Flex Technology”, which consists of a “Wave Flex Drive Unit” with a bending wave diaphragm, utilizing a 1.75” (44mm) voicecoil, while the low frequencies are generated by an “Air Flex” Woofer with an air pulse diaphragm driven by a 6.5” (165mm) carbon fiber woofer.

The IS6T feature Sonance’s Laminated Core Technology transformer (SLCT), delivering full-fidelity sonic performance in either 70V or 100V mode.

The IS6T is designed to install flush into a ceiling or wall and be finished over with up to 1/8” (3mm) of flexible material such as topping compound venetian plaster, wood veneer or wallpaper, to provide a completely invisible aesthetic.

Sonance’s proprietary “D.I.S.C. System”, allows the installer to accurately measure the thickness of topping material over the diaphragm to ensure optimum sonic performance is always achieved.

Certification includes UL2043, NFPA90, NFPA70 S7232 and UL1480.
