Introducing the Sonance Professional Series

From Sonance, the company that created the architectural audio category comes a range of professional loudspeakers that set a new benchmark in sound quality and aesthetics for commercial environments.

Sonance Professional Series includes a range of In-Ceiling, Pendant and Surface Mount Speakers that deliver unequalled fidelity, extremely low distortion, wide dispersion and a smooth power response. The range also shares consistent voicing, ensuring seamless sonic integration when used together throughout a space.

Sonance Professional Series PS-P83WT Pendant Woofer utilizes a minimalistic design similar to pendant lighting to blend discreetly into the environment, and take advantage of the same one-piece grille design as the In-Ceiling Speakers to deliver consistent sight lines when installed in the same space.

The integrated top cover hides the hanging hardware and wiring connector.

An ultra-high-excision 8” polypropylene woofer delivers effortless and impactful low bass extension and augmentation, at any sound pressure level.

Additionally, the Sonance PS-P83WT is certified for UL 1480 and UL 2239.

Available in either black or white (paintable).
