

Field Replacement of SA2 Installation Materials

In case the supplied SA2 Installation Kit gets misplaced or is on backorder, the substitute materials listed below will suffice. However, the SA2 Replacement Installation Kit (SKU# 40069) should be the first choice as it contains all necessary materials which have stood the test of time.

- **Vellum overlay:** Staedtler 100% Rag Vellum, Plain #946 185R;
 - Source: Hobby stores or architectural/drafting supply houses.
- **Adhesive:** Custom Building Products Standard Duty Clear Wallcovering Adhesive or Golden Harvest Premium Wallpaper Paste.
 - Source: Lowes, Ace, True Value etc.
 - The adhesive is appropriate for vinyl wall paper; it dries hard and will not reactivate.
 - As with any adhesive, the key to success is to allow it time to cure.
- **Joint Compound:** USG Sheetrock Brand Light-weight Easy Sand 45.
 - Source: Home Depot stocks this product nationally, in pallet quantities.
 - If the USG brand cannot be sourced, other quality brands may be used as long as they are a 45 minute-set "Hot Mud".
 - Do no use Pre-mixed joint compounds. They cannot create the heat necessary for proper adhesion to the speaker diaphragm.

The official SA2 Replacement Installation Kit (sku# 40069) contains the following items (enough to install two SA2 speakers)

- (2) Vellum overlays
- (2) 8-oz. bags of joint compound
- (4) #10-24 x 3 hex screws
- (4) #8 washers
- (4) High-density rubber standoffs
- (1) 5 /32 hex wrench
- (1) 8-oz jar of vellum overlay adhesive
- (1) Measuring cup
